Hi,

Bad news/good news/etc.

 We cancelled our vacation for next week.

The good news is that, if all goes well, next week will be a pretty regular work week for me. So I'll have more time to work on the lung ca and North Deering projects.

I didn't really want to go on vacation anyway!

CP

Good morning Chris,

I hope you had a good trip... and I'm sure you are looking forward to vacation next week. Thank you so much for getting the data geocoded for the N. Deering investigation. I plan to look at the data today and will be in touch if I have questions.

Next Tuesday we have a conference call with the Genetics Institute and would like to present the lung cancer data. Attached is the latest town distribution, which now includes Somerset and Waldo County, in addition to Aroostook, Hancock, Penobscot, Piscataquis, and Washington. Will you have time to map this data? I tried to get an official count of the number of towns (minor civil divisions) in the 7 counties of interest so we could calculate the percentage of towns that have 5 or more cases. The file I have includes all the Tracts (e.g. T10 R7 WELS). I suppose we should count these as towns, correct? The count was 669. Does that seem right to you?

I'm sorry if this late notice puts a wrinkle in your day. Please let me know if this will have to wait.

Thanks!
Castine
